

PROFILE

Motivated Full Stack Developer and Software Engineering student with a passion for solving complex problems and a drive to contribute to the growth of the digital world through innovative code.

SKILLS

Frontend
- React
- Next.js
- JavaScript
- HTML5
- CSS3
- Tailwind CSS

Backend
- Node.js
- Nest.js
- Express.js
- RESTful APIs

Databases
- PostgreSQL
- MySQL
- MongoDB

DevOps & Tools
- AWS
- Docker
- Git
- GitHub

Soft Skills
- Problem-solving
- Teamwork
- Communication
- Time management
- Continuous learning
- Adaptability

TEMESGEN WORKU

Junior Full Stack Web Developer

temesgen5586@gmail.com | 0955860777 | Bahir Dar, Ethiopia

EDUCATION

Software Engineering

Injibara University

Currently studying Software Engineering.

PROJECTS

Restaurant Management System

Full Stack Web App | React, Node.js, Express, MongoDB

- Developed a full-stack restaurant management system to streamline order processing, table reservations, and menu management for restaurant staff.
- Built a responsive admin dashboard with React for managing menu items, orders, and table availability in real time.
- Designed RESTful APIs with Node.js and Express and used MongoDB to store orders, users, and inventory data.
- Implemented role-based authentication (admin/staff) with JWT, ensuring secure access to management features.
- Deployed the application on Vercel and managed the codebase with Git/GitHub.

Abie Garage System

Full Stack Web App | Next.js, Nest.js, PostgreSQL, Docker, AWS

- Built a full-stack garage management platform enabling customers to book vehicle services and administrators to manage service records, appointments, and staff.
- Developed a secure, responsive interface with Next.js and Tailwind CSS featuring service booking, vehicle history tracking, and instant status updates.
- Created RESTful APIs with Nest.js and designed a PostgreSQL database schema for users, vehicles, services, appointments, and invoices.
- Implemented authentication and role-based access control (customer/staff/admin) using JWT and bcrypt.
- Containerized the application with Docker, deployed it on AWS, and used Git/GitHub for version control.
